Portfolio: robertbabiarz.com

PROFESSIONAL SUMMARY

Senior Product Designer with deep UX strategy, interaction design, information architecture, usability research, and design systems experience across enterprise IoT, SaaS, and regulated platforms. Led end-to-end product design at scale, including shipping in complex environments, leading designers, and contributing to 3 issued patents and 1 pending patent.

CORE UX COMPETENCIES — STRATEGY & BUSINESS OUTCOMES

- **UX Strategy & Vision:** Translated product strategy into multi-year experience roadmaps across the WaveLinx IoT portfolio, contributing to a 35% sales increase on WaveLinx Connected Systems in 2025.
- **Information Architecture:** Restructured dense operational data across Insights, Diagnostics, and commissioning tools using progressive-disclosure and three-tier drill-down patterns, reducing operator click depth by 89% and cutting report generation time by 90%.
- **Interaction Design:** Shipped novel interaction models for AR-assisted field tooling, DALI-2 commissioning, OTA firmware cascading, and AI-assisted layout, and a 175% lift in deep-feature navigation engagement.
- **Risk Management & Regulated-Domain UX:** Designed error-prevention workflows, audit-ready flows, and multi-role authority models across commercial IoT lighting (DALI-2, LEED/energy compliance, security provisioning) and iGaming (\$2B platform, 70+ jurisdictions, responsible-gaming and audit-trail mandates). Core patterns, anomaly dashboards, progressive disclosure, confirmation-gated destructive actions, rollback pathways, and role-scoped views, translate directly to financial-services risk dashboards, transaction flows, and compliance interfaces.
- **Design Systems:** Founded and scaled the CLS Design System from zero, the foundational platform for every new product across six concurrent IoT product lines in the Cooper portfolio.
- **User Research & VOC:** Scripted and led contextual inquiry, UAG field research, and VOC sessions with commissioning engineers, facility managers, and operators, converting qualitative signal into prioritized roadmap input that shaped product direction.
- **Team Leadership & Mentorship:** Led 3 junior designers through weekly critiques, stretch assignments, and design-system onboarding.

PROFESSIONAL EXPERIENCE

COOPER LIGHTING SOLUTIONS (a Signify company)

Mississauga, ON · March 2020 – Early 2026

6-year tenure · progressed Senior UX Designer 2 yrs → Principal UX Designer 1 yrs → Lead UX Designer 3 yrs

Results & Impact

- Led UX for the Light Architect SaaS platform, and AR-powered lighting design tool used by 4,000+ professionals and scaled from mobile to enterprise, supporting a \$6M+ product
- WaveLinx CORE Insights redesign, reduced operator click depth by 89%, increased deep-feature navigation engagement by 175%, and cut report generation time by 90%.
- Contributed UX leadership to a 35% sales increase on WaveLinx Connected Systems in 2025.
- Led UX on the DALI-2 lighting system to be deployed at Peter Gilgan Mississauga Hospital (Trillium Health), a regulated healthcare environment.
- Led UX on a Cascading OTA Firmware Update workflow, autonomous firmware delivery across the BLE mesh that removed technicians from the per-device loop.

- Delivered WaveLinx CORE Partitioning, ITR-based auto-reconfiguration that reshapes lighting zones in real time as movable walls open and close, without manual intervention. An Industry First.
- Founded the CLS Design System in Figma in 2022 and scaled it across every product line as the shared design foundation.
- Established and chaired the monthly UX showcase forum for Product Owners, Engineering, Firmware, Architecture, Directors, and Managers, the primary mechanism for cross-team visibility into design direction across the portfolio.
- Self-initiated a full WaveLinx Touchscreen Gen 2 redesign, demonstrative prototype that shaped Gen 2 Discovery roadmap decisions at the Product Management level.
- Rescued the UAG 2023 testing program under blockers, prepared and presented two major new WaveLinx features to Cooper's top agents and customers, capturing VOC that fed the 2024 roadmap.
- Prototyped and pitched an AI Diagnostic Dashboard and fixture-recommendation engine, moved from internal hackathon through leadership review onto the product roadmap.
- Elevated UX maturity inside an engineering-first organization over multiple years and product cycles, building cross-functional trust that moved design from late-stage input to a founding voice in product strategy and scoping decisions.

Recognition, Ratings & IP

- Exceeds Expectations performance ratings across 2023 and 2024 annual reviews, both Timely Delivery and Mentorship categories. "Strong" overall rating for 2020/2021.
- "Above & Beyond — Passion — Customer-focused Product Feature Development" award by Director of Advanced Development for the Light Architect Download Manager.
- TED Magazine "Best of the Best" 2024, Cooper Lighting Solutions supplier-category recipient.
- 3 issued patents, 1 pending, first-to-market interaction innovations

PARLAY GAMES INC.

Oakville / Burlington, ON · January 2000 – March 2020

20-year tenure · progressed Senior Designer 10 yrs → Lead Designer 8 yrs → Lead & Design Manager 2 yrs

Results & Impact

- Owned the full product design portfolio for a real-time iGaming platform processing \$2B USD wagered annually, serving 2.8M concurrent players across 70+ global operator clients and nine regulated jurisdictions (UK, Spain, Italy, Kenya, Denmark, US, Brazil, Bahamas, Canada).
- Delivered UI/UX across a suite of 50+ games and transactional products, evolving the stack from Java through Flash, HTML5, iOS, and Android, maintaining design continuity across four major technology generations.
- Architected a global skinning system that enabled full platform customization by client brand, jurisdiction, and product offering without developer involvement, reducing launch friction for new operator deployments.
- Designed regulated real-money wagering, responsible-gaming controls, age-verification, and back-office financial-transaction oversight across nine regulated markets, each with materially different compliance requirements for odds display, responsible-gaming prompts, KYC/AML, and audit trails.

EDUCATION

Bachelor of Fine Arts with Honours, BFA, Design and Applied Arts, York University

TOOLS & TECHNICAL SKILLS

- **UX/UI & Prototyping:** Figma (Auto Layout, Variables, Design Systems), Adobe Creative Pro, Adobe XD, Claude Code Collaboration.
- **Research & Collaboration:** Contextual inquiry, VOC/UAG, usability scripting, A/B concept testing; Jira, Confluence, Agile/Scrum.
